C-27 Westwood Brown	C-13 Tawny Pink	C-22 Coral Red	C-32 Quarry Red
C-31 Shadow Slate	C-14 French Gray	C-24 Charcoal	C-34 Dark Gray

Concrete color is altered by many factors including cement color, slump, finishing practices, and curing method. Using the contemplated materials and construction techniques, representative samples should be cast for approval, especially when exact color matching is important, when special finishes are specified, or when placing vertical concrete.

Prices vary depending on color. For standard colors, the first digit of the "C" number identifies the price group with Group 1 colors being the lowest in price. For designer colors, * denotes Group 1 colors, ** denotes Group 2 colors, and *** denotes Group 3 colors. Custom colors can be designed and are manufactured per quotation. Matching colors are available in LITHOCHROME® Color Hardener for dry-shake applications and in LITHOSEAL™ Trafficalk-3G™, a premium-quality joint sealant for pedestrian and vehicular traffic areas.

Colors shown approximate the color of broom-finished concrete flatwork made with a medium-gray cement and cured with LITHOCHROME® Colorwax™ or COLORCURE® Concrete Sealer in the matching color. Concrete not so cured will have less brilliance. Concrete should be batched and placed in accordance with Scofield Tech-Data Bulletin A-304.

SCOFIELD™ Overlay™ and SCOFIELD™ Texturetop™ are available in colors to approximate all standard and designer colors of CHROMIX Admixtures shown. Not all colors are inventoried. Contact your Scofield representative for stock status.
